FOUNDER'S CREATION

“

I am an Artist and Educator, creative and innovative thinker with strong styling, Photographic and design skill. I am living in Gurugram, Haryana, India. I was born in Mirzapur, Uttar-Pradesh but have lived most of my life in Allahabad. I went to art college in Allahabad and Varanasi, achieving a first class honors' degree in Applied Art. My approach to styling is based upon thorough concept generation for the advertising creative's. as a professional artist I am continuing to create pieces of artwork that are able to be express inner thoughts of human beings and soul of the society. My artwork takes a critical view of social, political and cultural issues.

As a professional artist I am continuing to create pieces of artwork that are able to be express inner thoughts of human beings and soul of the Indian society. My artwork takes a critical view of social, political and cultural issues. I was captured extraordinarily strange but beautiful figural expressions. It is the combination of human forms and gestures, symbols and elements of the environment together with the artist's skillful execution that formulated a new visual logic. The paintings are neither representation of reality nor illustration for literary text. They represent a systematic visual language that functions independently.

My approach is not only looking at the form and spirit of the human figures as in traditional works. I pay particular attention to the feelings and thoughts, as they are important expressive tools in creation. At the end, though the animal and nude series appear quite different from the basic structures, both display the same kind of direction in my visual language investigation. Some of my subjects are quite beautiful, others less so. My goal is to inspire those who see my work to look more carefully at the world around them, to discover reality of life in unusual places.
